Select Assessment > Instructions

Before you start:

- 1. This is a timed question and the timer cannot be paused once you click on the 'Solve challenge' button below. Please ensure you are not interrupted for the duration of this assessment and hit the "Submit challenge" button once you are done.
- You are encouraged to use Chrome to solve these challenges on your desktop or laptop. If you accidentally close your browser, return to this assessment page using the invitation link provided to you.
- 3. For code challenges, you will need to save / build your code & run tests before the timer runs out. If you are unable to do so, your last compiled coding will be submitted to the assessment administrator when time expires.
- 4. For code challenges, unless specifically stated in the coding challenge, no third party/built-in libraries and/or functionalities should be used in your code.
- 5. Your final score on this assessment will only be available to you at the sole discretion of the challenge host.
- If you are new to HackerTrail, it is recommended that you familiarise yourself with our coding environment before starting this challenge.

- 7. In case of any technical difficulties encountered while attempting this assessment, please reach out to us at support@hackertrail.com with pertinent information, including a screenshot if possible.
- 8. Stay calm and best of luck!
